

Fire Protection Engineer (5+ years experience)

Leading Engineering Consultancy

Work on prestigious, award winning projects

Enjoy coming to work each day!

We are seeking a motivated and experienced **Fire Protection Engineer** to further strengthen our Building Services team

Job Description

In this position you would be liaising directly with clients, architects and builders, provide detailed design and analysis of major projects, and attend key site inspections and meetings.

You would be working on a diverse range of landmark projects; including residential, commercial, industrial, health and education sectors.

Technical Skills

Proven experience managing projects including experience with:

- Sprinkler layout to AS 2118,
- Smoke and thermal detection design to AS1670;
- Good understanding of NCC-BCA

Non-Technical Skills

- Experience with multi discipline building services co-ordination
- A good understanding of architectural requirements & attending meetings
- Experience using computer software, such as Hyena

To be considered for this position we require you have the following:

- Bachelor or Master's Degree in Engineering/ Science.
- Accreditations in Fire Protection Engineering
- 5-10 years industry experience
- Excellent communication (written & verbal) skills
- High proficiency in Microsoft Word, Excel and Outlook
- Ability to work collaboratively with both engineers and draftspersons across all disciplines
- Career motivated

The successful candidate will be offered a competitive salary package and access to our staff benefits, including (but not limited to):

- Flexible work arrangements
- Paid overtime
- Additional leave
- Performance bonuses

We strive for excellent work-life balance, and offer extensive professional development and career opportunities. Please send your CV and a covering letter to hr@irwinconsult.com.au.

Please note that only those eligible to work in Australia should apply. Irwinconsult is an EEO employer.
